

## The more you play, the more you'll appreciate a well stacked deck.

With taped music, as in five card stud, you'll always get the results you want when you play with a deck that always delivers what you want.

Take this deck, one of the five new cassette decks from AKAI. The GX325D. It comes stacked with features to make your music sound clearer. And richer. It has a three head function, with separate recording and playback heads for wider frequency response. It comes with a closed loop double capstan, which maintains proper back tension, and perfect tape and head contact.

And, like all AKAI Hi-Fi equipment distributed by AKAI Australia, it's covered by our Complete Protection Plan.
